WHAT IT TAKES AND HOW

FOUR STEPS TO GETTING YOUR CAR

1. DEFINING YOUR CAR

Our job is to find the right car for you – not to sell you a particular car. Thanks to our knowledge of the Swiss and European car markets, we will find the best place to get your car at, at the best price. We can source new, nearly new (less than 1 year old & 25,000km) and used cars.

2. FINANCING AND ORDERING

You can either choose your own financing company or we can assist. We are able to help you get a leasing contract with an L-permit (provided you have a valid work permit for the length of the leasing contract).

Ordering your car is simple: once we have received your signed contract and a down payment of 10% we take care of the rest!

3. GUARANTEE AND INSURANCE

For used cars that do not have a guarantee anymore, our partner offers a warranty of 20'000km or 12 months. Our partner takes care of registration and competitively priced insurance.

4. DELIVERY AND DEADLINE

Before we deliver any new or used car, we make sure all is fine with it, clean it and make it ready for you. We then deliver it right to your home or office. We give an estimated delivery date when you order. When you get your car depends on whether it is new or not, and where it comes from.

The delivery time can vary depending on the origin of the car:

- Used cars imported into Switzerland: 3 to 4 weeks
- Used cars from within Switzerland: 1 to 2 weeks

FREE CONSULTING

For all newcomers to Switzerland, we are happy to offer a free telephone consultation to better understand what the various available options are when acquiring a car.

The objective is to provide support in taking the right decision about what kind of car is suitable for each person or situation.
